

Patient Check-up Process

The following are the processes that a patient will follow when they enter for a complete check-up:

1. Patient registration
 - Patient arrives at the registration desk
 - Patient presents their ID and insurance card
 - Patient fills out a registration form
 - Patient pays their copay
2. Medical history and examination
 - Patient meets with a nurse to take their vital signs and medical history
 - Patient meets with a doctor for a physical exam
 - Doctor may order additional tests, such as blood work or X-rays
3. Diagnosis and treatment
 - Doctor reviews test results and diagnoses the patient
 - Doctor discusses treatment options with the patient
 - Patient receives treatment
4. Follow-up and discharge
 - Patient may need to schedule follow-up appointments
 - Patient receives discharge instructions
 - Patient leaves the hospital
